

Summary

I am currently looking for a Front-end Developer job opportunity that will allow me to work alongside an expert team of developers, thereby helping to drive my career progression to more senior roles in the future. I'm keen to learn directly from seasoned industry professionals.

Working Knowledge Of

HTML | CSS | SASS | Bootstrap
JavaScript | ES6 | jQuery | Ajax | JSON
Version Control (Git) | Responsive Design | Photoshop | Visual Studio Code

Projects

Joblookupbasket

- A Job search website developed in a collaboration with a back-end developer.
- My tasks were to design the layout and all components for this site including admin panel.
- Used HTML, CSS, bootstrap, JavaScript and jQuery.
- Version control of choice was Bitbucket.

MasssTailor

- A local tailor's website developed with HTML, SCSS, JavaScript and JSON.
- Ajax used for easier content Management directly from JSON file.
- Fully responsive on any screen size

Plough

- A restaurant website developed with HTML, CSS, Bootstrap and JavaScript
- jQuery Library used to Implement photo gallery.
- Good API Used to display a Map.
- Fully responsive on any screen size.

Hunter Agency

- A fictional single page website development agency developed in HTML, Sass, Bootstrap and jQuery.
- jQuery used throughout the website for video player, animated number counter, photo gallery with filter feature and auto scroll customer testimonials.
- Fully responsive on any screen size.
