

Summary

I am a highly motivated self-taught developer currently looking for a Junior Front-end Developer job opportunity that will allow me to work alongside an expert team of developers, thereby helping to drive my career progression to more senior roles in the future. I'm keen to learn directly from seasoned industry professionals.

Working Knowledge Of

HTML | CSS | SASS | Bootstrap
JavaScript | ES6 | jQuery | Ajax | JSON
Version Control (Git) | Responsive Design | Photoshop | Visual Studio Code

Experience & Projects

Joblookupbasket

- A Job search website developed in a collaboration with a back-end developer.
- My tasks were to design the layout for all pages and components for this site including admin dashboard and inline HTML email templates for users.
- Used HTML, CSS, bootstrap, JavaScript, jQuery and Bitbucket for version control.
- Populated user data into table using jQuery data tables plugin.

MasssTailor

- A local tailor's website developed with HTML, Sass, JavaScript and JSON.
- Ajax used for easier content Management directly from the JSON file.
- Fully responsive using CSS media queries and grid system.

Plough

- A restaurant website developed with HTML, CSS, Bootstrap and JavaScript.
- jQuery Library used to Implement photo gallery.
- Google Maps API Used to display an interactive Map.
- Tested in multiple browsers to ensure cross-browser compatibility.

Hunter Agency

- A fictional single page website development agency developed in HTML, Sass, Bootstrap and jQuery.
- jQuery used throughout the website for video player, animated number counter, photo gallery with filter feature and auto-scroll customer testimonials.
- Fully responsive on any screen size.
