

## Summary

I'm a self-taught front-end developer with over 1-year experience who's seeking to obtain a creative and challenging position that utilizes current knowledge of web development. I extensively worked developing Responsive Websites along with developing web page effectively using HTML5, CSS3 and JavaScript. I possess a good knowledge of computer software packages (frameworks and tools) that are used in today's technology. I'm keen to learn directly from seasoned industry professionals.

## Working Knowledge Of

HTML / CSS / SASS / Bootstrap / Material-UI / BEM / Responsive Design

React / JavaScript / ES6 / jQuery / AJAX / JSON / npm / Babel / webpack

Version Control (Git) / Photoshop / Visual Studio Code / SEO

## Experience & Projects

More projects available at [Portfolio](#)

### Joblookupbasket

- Worked with back-end developer to design and implement UI for entire website.
- Created admin dashboard UI with Bootstrap and populated data using jQuery DataTables.
- Designed and developed email templates using HTML and CSS for effective email marketing.
- Involved in using bitbucket, for project management and version control.

### MasssTailor

- Developed the UI layout and front-end programming that matched client's requirements.
- Replicated a backend API functionality in JSON file for easier content management.
- Applied media queries to create responsive website across different size of screens.
- Used JavaScript DOM manipulation and JavaScript events to generate the data result in UI.

### Plough

- Developed website mock-ups for the client to ensure quality control and client satisfaction.
- Implemented Google Maps API to embed a map and jQuery libraries to display gallery.
- Used Bootstrap for responsiveness and tested multi-browser compatibility along with custom CSS.
- Updated web content (including images, links, and text) on a total of 6 pages in under 3 hour span.

### Hunter Agency

- Designed and implemented CSS animations for hover effects and loaders.
- Used JavaScript and jQuery for gallery filter and navigation bar functionality.
- Implemented website creative content and overall UI functionality to improve user experience.
- Sass pre-processor used to reduce repetition of CSS to save time.

## Formal Education
